Executive Summary

Our mission with SHIBARMY is to bring together and inseparably unite the Shiba Inu supporters under one roof, which is rewarding for holders and \$SHIB. We named our ambitious project and token SHIBARMY, which launched on October 2021, it is a vetted, audited project that pays its holders 8% of each transaction \$SHIB BEP20 tokens as a dividend.

Our vision for this project and community is to become a go to name for all crypto enthusiasts around the world, while offering a competitive DeFi product and state of the art technologies. Furthermore, there is a constant need for education of newcomers in the space, and we want to help them by providing in-depth explanations and support.

Opportunity

The current mania around cryptocurrencies has opened up many opportunities to invest and obtain massive returns of investment within a short timeframe.

With a market cap of more than \$2,700,000,000,000 USD crypto will change lives and offers excellent opportunities to create something unique and valuable. Established cryptocurrencies like \$DOGE or \$SHIB offer many benefits and receive public exposure making them a fun and potent investment in this market.

They all share a big downside, their price potential is minuscule in comparison to new projects on the Binance Smart Chain which can easily 100x-10000x their current price.

We developed the plan to combine both worlds of high price potential and the accumulation of well-known meme coins, by creating the Shibarmy Reward Token, which enables our holders to earn a big share of \$SHIB.

History and Team

We as a team have been thrilled for cryptos for years and collectively earned many experiences within the last 12 month, especially towards Defi and how to utilize the potential of smart contracts.

While we all joined the incredible ride of Shiba Inu at some point in the past, in September 2021 we had a realization that we want to give everyone the opportunity to get into it too. The goal was to design a rewarding new token on the Binance Smart Chain while affiliating ourselves with the #Shibarmy. The Team is driven by experienced crypto enthusiasts from multiple fields, we are combining all it takes to create new technology and promote it accordingly.

Tokenomics and Development

I. Tokenomics

We deliberately designed our smart contract to support the goals we decide on as a team. Our tokenomics are made with this in mind too.

Ticker: \$SHIBARMY

Contract: 0x940230b6b7ef1979a28f32196a8e3439c645ba49

Total Supply: 100 000 000 000 000 (100 Trillion)

Rewards, Automatic LP Creation and Marketing

- ◆ 1% out of each trade is properly distributed toward automatically generating liquidity.

Dividend Distribution

- ◆ 8% out of each trade is distributed in \$SHIB tokens.

Marketing

- ◆ 1% out of each trade contributes toward the SHIBARMY marketing wallet.

LP Locked for 1 Year:

<https://www.team.finance/view-coin/0x940230b6b7ef1979a28F32196A8e3439C645BA49?name=Shib%20Army&symbol=SHIBARMY>

II. Development

Like any successful business we require marketing funds to run our project, the contract will automatically redirect the 1% marketing funds to the marketing wallet. This is allowing us to be extremely aggressive with marketing campaigns and the excellent opportunity to grow fast and do manual burns.

We have laid out the Roadmap which is under constant development itself. This way you can be assured that the intermediate Plan is always up to date while maintaining a view into the future of Shibarmy.

Our Reward Dashboard is the first released product, and we just finished our first two Community Contests. They are aimed towards social engagement and entertainment for the community, while offering competitive and interesting pricepools that are worth the efforts.

We focus our marketing around an expanding budget which allows us to use multiple ways of attracting new investors. Banner Ads, Advertorials, Press Releases, Youtube Videos and Social Media Influencers are utilized and we will constantly expand and test new ways to succeed

Stage 1

- ✓ Launch on PancakeSwap
- ✓ Website launch
- ✓ Marketing campaign
- ✓ Audit

Stage 2

- ✓ SHIBARMY airdrop
- ✓ Litepaper release
- ✓ Coingecko listing
- ✓ Coinmarketcap listing

Stage 3

- ✓ Website update
- ✓ Dashboard
- ✓ Various contests
- ✓ Buyback

Stage 4

- ✓ Manual burn
- ✓ NFT minting
- Whitepaper release
- Partnership

Stage 5

- Second buyback
- Second manual burn
- P2E game
- More NFT series

Stage 6

- Dev team expansion
- Expansion to the Asian markets
- CEX listing
- Bringing use case to SHIBARMY

NFTs

During the first month, we developed an unique idea to bring value to the SHIBARMY Community and give early investors an edge over others.

With the release of our first NFT Series we laid the foundation to strengthen our project by dedicating the generated funds to finance future development like Play 2 Earn Games and provide more Liquidity to the project.

<https://shibarmybsc.medium.com/shibarmy-and-our-first-nft-release-faef06b42c66>

We are working on more exclusive NFTs already and have joined forces with designers to bring more diverse and quality content to this endeavour.

By buying one of our NFTs you become a vital part of the Shibarmy Project and enable us to improve the stability and longevity of this project.

P2E Shibarmy Games

In today's digitized world, gaming has become increasingly relevant. The average gamer spends playing in the digital realm. As gaming intersects with crypto, we are observing a modern interpretation of the play-to-earn paradigm – dub it P2E 2.0.

In striking contrast to previous P2E games, where only the most competitive tournament players could earn from it, every blockchain gamer earns by playing in the emerging crypto-powered version of P2E.

Shibarmy and the Shib-Universe will become a part of this development. We will be working with established professionals to develop an entertaining and visual pleasing experience. This goes well with our engagement on NFTs where we are able to establish a strong brand and designs.

The Benefits

Our development towards more ways for our holders to earn including: NFTs, P2E Games, Giveaways and Contest. This ensures that investing into \$SHIBARMY is a longlasting pleasure. Investors profit from a growing project with long term goals:

- ◆ You don't need to stake or add liquidity to be properly rewarded.
- ◆ We are using a dividend tracker token, which always calculates your earned \$SHIB for you until you claim it.
- ◆ Our new website includes a [Dashboard](#) to easily maintain track of your rewards and to claim them at any time.
- ◆ Buying \$SHIBARMY is quickest and easiest way to earn \$SHIB on the BSC.
- ◆ Having an experienced team combined with ambitious goals and the community in mind will allow us to form a sustainable project for everyone.
- ◆ Active socials and constant development updates.

Conclusion

The **Shibarmy** Token and prosperous community represent the connection and support for the “Shiba Inu Army” or Shibarmy and positions themselves at the top of reward tokens on the binance smart chain.

It is worth checking out our socials and medium for further information and don't hesitate to join our [Telegram](#) group to acquire the latest information and chat directly with the community.
